

# G5RL Relay Featuring TV-8 Rating

- Omron is pleased to introduce the G5RL series power relays with TV-8 rating.
- The G5RL –TV8 type is a SPST-NO low profile power relay
- Higher performance for high inrush current of 117A.

## FEATURES AND BENEFITS:

### Features

- TV-8 @ 120VAC lamp load (25,000 cycles)
- 250VAC 16A / 24VDC 16A resistive load (50,000 cycles)
- Prepared both flux tight and sealed type

### Benefits

- High switching capacity
- Same switching ability as G5RL-1A-E-HR
- Prepared for cleaning process

## APPLICATIONS:

- Typical applications include motors, lamps and pumps, where high inrush resistance is required.
- Other applications include FA/industrial equipment, machine tools, robots, air conditioners, LED TVs, and lighting, such as LEDs and incandescent lamps.

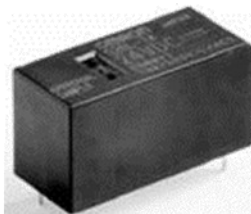

## MORE FROM THE G5RL FAMILY:

**G5RL-LN (Low Noise)**

Super Quiet

**G5RL latching relay**

Latching Relay High Inrush

**G5RL-HR (High Inrush)**

100A inrush current
